

AutoCAD® Fundamentals - 1

Objective: Learn to create basic 2D drawings in AutoCAD®. Begin by working with a few basic tools in order to create and edit a simple drawing. Then continue to develop and use more advanced tools through the course. Not every command or function will be covered since this course only represents the core essentials required for recognizing and understanding the basic principles of the software.

Course Length: 3 days (24 hours)

Day 1

- Basic Drawing & Editing Commands
- Projects – Creating a Simple Drawing
- Drawing Precision in AutoCAD®
- Making Changes in Your Drawing

Day 2

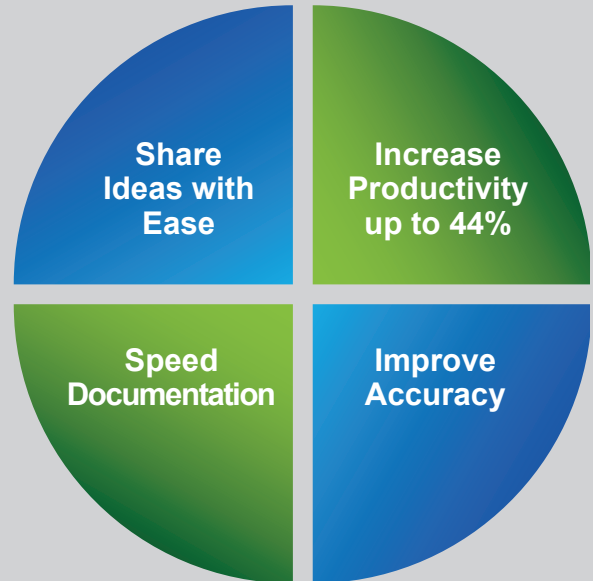

- Organizing Your Drawings with Layers
- Advanced Object Types
- Getting Information from Your Drawing
- Advanced Editing Commands

Day 3

- Setting Up a Layout
- Printing Your Drawing
- Projects – Preparing to Print
- Text
- Hatching

- Lunch is included when training at our facility.
- Class is from 8:30 a.m. to 4:30 p.m.
- Students will receive a certificate upon completion.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- Attend the class in person at our training center in Atlanta or virtually from anywhere in the world via the internet

Prerequisites: A working knowledge of basic design/drafting procedures and terminology as well as Microsoft operating system.

Advantages to Training at Repro Products' Autodesk® Authorized Training Center:

- Learn from our Autodesk Certified instructors at our superior facilities.
- Receive Autodesk® recommended content from Autodesk® Official Training Guides.
- Get your hands on sample projects and exercises that emphasize real-world application.

Call 678-640-9965 to schedule your training.
